FOR INTERACTIVE PANEL DISTRIBUTORS, RESELLERS & SYSTEM INTEGRATORS

Sell More Than an Interactive Panel

Win more school deals with a demo that stands out: 2,700+ interactive 3D models, AI teaching tools and ready-to-teach lessons on the panels you already sell.

Hardware from you. Teaching software from TutAR.

You supply, install and support the interactive displays. We supply TutAR teaching software to complete your offer. Together, we help schools use their panels for far more than writing and presentations.

We sell software only. We never compete with you.

Some classroom software companies also sell their own panels. TutAR doesn't. Your schools, your panels and your customer relationships stay yours.

What schools experience

Interactive 3D. 2,700+ curriculum-mapped models, organised by grade, subject and topic.

AI teaching tools. Explain concepts, create quizzes and solve equations step by step.

Ready-to-teach content. Lesson templates plus interactive PhET science and maths simulations.

See TutAR in action

THE CLASSROOM VALUE

Show what teachers can do, not just what the panel displays.

With TutAR, your team demonstrates a real lesson.

Your demo, step by step

Open with 3D. Rotate and zoom a 3D model to explain a hard concept in seconds.

Prove the time saved. Generate a quiz or lesson material from any topic, live in front of teachers.

Bring science to life. Run interactive PhET science and maths simulations inside TutAR.

Start with content. Open a ready-made lesson instead of an empty whiteboard.

Open the door for free. Schools can try TutAR Web free in their browser, then buy the full version on your panels.

Why resellers add TutAR

Win more demos. Show the teaching software in a classroom demo.

Sell more than hardware. Add software value to every panel deal.

Bundle across brands. One software offer for compatible Android panels across your range.

No software team needed. Offer a complete teaching solution without building your own.

Is your panel range TutAR-ready?

Compare your panels with our tested chipset configurations, including Amlogic, Goke and MediaTek.

THE PARTNERSHIP

How the Partnership Works

A clear split of roles, so each side does what it does best.

You bring	TutAR brings
The interactive panels and brands you already sell	3D, AI and content-rich teaching software
Your school relationships and local territory	TutAR licences at partner terms, direct from us
Delivery, installation and on-site support	Demo kits, sales training and product sheets
Implementation and after-sales service	Licence fulfilment, updates and partner support

How to get started

Tell us about your business. Your territory, panel brands and the schools you serve.

Explore TutAR together. Try it hands-on with our team and shape a demo that fits your schools.

Discuss your plans. Expected volumes, customer needs and the panels you support.

Shape your partnership. We put together partner terms that fit your territory and growth plans.

Get onboarded. Training and sales material for your team, so you can start selling.

Let's grow together

Tell us where you operate, the panels you sell and your plans.
